

PHASE 01

CURRENT PROTOTYPE

SIH Working Prototype

CURRENT BUILD

- Artisan voice / image input
- Vision image enhancement
- Multilingual NLP catalogue
- AI-assisted pricing
- Validation & state management
- B2B marketplace
- Bulk orders
- 7-language interface
- Automated regression tests

CORE JOURNEY

Craft > Voice > AI > Catalogue > Price > Buyer > Bulk Order

PHASE 02

NEXT IMPLEMENTATION

Pilot Deployment

DEPLOYMENT

- Vercel frontend deployment
- Render FastAPI backend
- Persistent database / storage

OPERATIONS

- Production authentication
- Monitoring & error logging

VALIDATION

- Real-artisan pilot validation

PHASE 03

INTELLIGENCE & SCALE

Intelligence & Scale

AI INTELLIGENCE

- Regional market-price datasets
- Improved multilingual speech / NLP
- More Indic languages
- Async AI processing

PLATFORM SCALE

- Background workers
- Caching
- Scalable database
- Object storage
- Analytics

PHASE 04

FUTURE SCALE

Ecosystem Expansion

COMMERCE

- ONDC / digital commerce integration
- Government / institutional buyers
- Retail & wholesale partnerships
- Logistics integration
- Payments

COMMUNITY

- Community onboarding
- Production-grade security

"Start simple > Validate with artisans > Productionize > Scale the ecosystem"

ShilpVani is designed modularly, allowing each AI and commerce layer to evolve independently without rebuilding the entire platform.
